GARDENS AND THE PICTURESQUE
Studies in the History of Landscape Architecture
John Dixon Hunt

John Dixon Hunt is widely considered one of the foremost of today's writers on the history and theory of gardens and landscape architecture. Gardens and the Picturesque collects 11 of Hunt's essays—several of them never before published. From Castle Howard in Yorkshire to French impressionist gardens, they explore the ways in which men and women have given meaning to gardens and landscapes, especially with the ways in which gardens have represented the world of nature "picturesquely."

300 pp., 127 illus.  $35.00 (July)

THE ARCHITECTURE OF WESTERN GARDENS
A Design History from the Renaissance to the Present Day
edited by Monique Mosser and Georges Teyssot

"An important resource for all garden historians...a wonderful book."—Penelope Hobhouse, Garden Writer, Historian, and Designer

"A monumental and brilliantly illustrated physical and intellectual history of gardens since the Renaissance that belongs in every serious library; invaluable to every student of the overwhelming role of architecture in even the smallest garden."

544 pp., 652 illus., including 130 4-color plates  $125.00

THE MEANING OF GARDENS
edited by Mark Francis and Randolph T. Hester, Jr.

"Each of the thirty contributions has thoughtful and provocative things to say about gardens and gardening, as well as about society and nature and our place within them. Taken as a whole, they stretch the mind, push back the boundaries that delimit our perception of the garden, and challenge us to create landscapes that are right for today."—Pacific Horticulture

Available at fine bookstores or toll-free 1-800-356-0343

55 Hayward Street The MIT Press Cambridge, MA 02142
CREATING THE NORTH AMERICAN LANDSCAPE
Gregory Conniff, Bonnie Loyd, and David Schuyler, Consulting Editors

BRAVO 20
The Bombing of the American West
Richard Misrach with Myriam Weisang Misrach
Decades of illegal target practice by Navy bombers have turned 40,000 acres of public land into one of Nevada's "hottest" properties. In Bravo 20, award-winning photographer Richard Misrach shows what the military has done to the land—and offers a bold new plan to stop it. He proposes reclaiming the land as a national park and America's first environmental memorial. 40 color, 9 black/white photographs, 67 drawings and maps. $25.95 paperback $49.95 hardcover

NUCLEAR LANDSCAPES
Peter Goin
A remarkable photographic record of the legacy of U.S. nuclear weapons testing. Peter Goin gained unprecedented access to test sites and facilities in Nevada, Washington, and the South Pacific to take pictures of these profoundly altered "nuclear landscapes." 72 color, 28 black/white photographs. $29.95 paperback $59.95 hardcover

GREENWAYS FOR AMERICA
Charles E. Little
In the first comprehensive account of the citizen-led effort to build "greenways"—linear open spaces that are perfect for walking, jogging, biking, and enjoying the natural scene—Charles Little describes dozens of projects. Maps and color photographs illustrate notable success stories: urban riverside greenways, trails along canals and abandoned railroad rights-of-way, scenic drives, historic routes, and natural corridors for wildlife. $22.95 hardcover

THE LAST GREAT NECESSITY
Cemeteries in American History
David Charles Sloane
In the transition from churchyards to urban cemeteries to suburban memorial parks, cemeteries in America changed from sacred refuges to business ventures. Looking at a variety of influential cemeteries—from New Haven Burial Grounds to Forest Lawn in Glendale, California—David Charles Sloane concludes that the American cemetery is a unique record of how the landscape is created and altered by economics and practical needs, by institutions and powerful ideas. $35.95 hardcover

THE SPANISH-AMERICAN HOMELAND
Four Centuries in New Mexico's Rio Arriba
Alvar W. Carlson
Ever since the Spanish settled the upper Rio Grande Valley in 1598, Spanish Americans have considered the Rio Arriba their spiritual and cultural home. But they have done so against seemingly impossible odds: a harsh semiarid environment, an enduring rural poverty, and cultural conflict with their Indian and Anglo neighbors. $39.95 hardcover

ALSO OF INTEREST

THE BETWEENNESS OF PLACE
Towards a Geography of Modernity
J. Nicholas Entrikin
What makes New York City different from Moscow? Are small towns looking more and more alike? What criteria should we use to distinguish one place from another? The ongoing controversy about how (or even whether) to study place and its meaning in modern life forms the focus of J. Nicholas Entrikin's pioneering work. $13.95 paperback

SOIL CONSERVATION IN THE UNITED STATES
Policy and Planning
Frederick R. Steiner
Voluntary efforts and new legislation have failed to solve America's most serious—and most ignored—environmental problem: soil erosion. Written by one of the foremost authorities on the subject, Soil Conservation in the United States reviews recent efforts and recommends new initiatives to lower erosion to virtually zero by 2025. $18.50 paperback

Seed to Civilization
The Story of Food
New Edition
Charles B. Heiser, Jr.
This lively book recounts the intriguing story of the plants and animals that stand between humans and starvation. Charles Heiser, preeminent botanist, writes with great verve about questions of where, when, and how humankind's food plants and animals were domesticated. In narrating his tale, he traces the intricate patterns of food use and distribution that have developed from prehistoric times to the present.

"Heiser brings foods to life. Here is one outstanding scientist who does not shrink from popularizing his science."
—Richard E. Shultes, Economic Botany
$29.95 cloth $12.95 paper

The Orchids
Natural History and Classification
Robert L. Dressler
"Most recently published books on orchids have been either impressive picture books having little information or relatively technical collections of articles written by specialists for others of their kind. Dressler presents something from both categories and adds considerably more... Delightful to read."
—Lee Kavaljian, Quarterly Review of Biology
95 color illus., 22 halftones, 99 line illus. $15.95 paper

The Cactus Primer
Arthur C. Gibson and Park S. Nobel
"[Nobel's book] is a pleasure to read, highly informative on a wealth of subjects, and profusely illustrated... A marvelous example of how all the components of scientific inquiry fit together to illuminate the biology of a fascinating evolutionary lineage."
—Michael Nee, Brittonia
304 halftones, 92 line illus., $19.95 paper

A Reunion of Trees
The Discovery of Exotic Plants and Their Introduction into North American and European Landscapes
Stephen A. Spongberg
Prologue by Sam Bass Warner, Jr.

Stephen Spongberg's vividly written and lavishly illustrated "travel story" of trees and shrubs tells of intrepid and extraordinary explorers who journeyed to the far corners of the globe and brought back to Europe and North America a wealth of exotic plant species. It constitutes a veritable history of ornamental trees and shrubs.
8 1/2 x 11, 144 halftones, 29 color illus., 57 line illus., 272 pp. $35.00 cloth

Harvard University Press
Cambridge, MA 02138
Order Phone: (617) 495-2480
Carl Steinitz, in the foreword of “Landscape Ecology” describes this book as being of “great interest and value to planners, designers and managers of our land resources, whose actions must be understood from the perspectives of many natural systems, with particular attention to spatial and temporal impacts.” He further states that this ground-breaking book impels us in the direction of a more comprehensive understanding of the spatial dynamics of landscape. It is a best seller in the American Society of Landscape Architects bookstore.

Hardcover, 619 pages
ASLA Member price: $38.50
Nonmember price: $45.10

Beautifully illustrated and entirely in color, Color Drawing presents comprehensive approaches to planning and executing finished drawings. Easy-to-use techniques for color composition and design presentation are included.

Hardcover, 320 pages
Member price: $36.95
Nonmember price: $45.95

This powerful environmental classic—updated edition—explains what we must do to assure more livable, productive, efficient and attractive communities in the future. Over 200 illustrative drawings and case studies makes it one of the most informative and comprehensive books ever written on achieving a sensitive integration of man-made structures with the living landscape.

Softcover, 352 pages
Member price: $29.95
Nonmember price: $34.95

This important new book emphasizes why team designs are unique, if not superior to designs generated by a single discipline. It examines how landscape architects, architects, urban planners and artists are working together in the design process. A wealth of case studies includes Battery City Park, Williams Square in Dallas and Ceremonial Square in Miami.

Hardcover, 146 pages
Member price: $26.00
Nonmember price: $27.95

The English Town
A History of Urban Life
Mark Girouard
The author of Life in the English Country House "takes us to and through a variety of English towns—from cathedral towns to seaports, spas to mill towns—telling us about their origins, their history and development, the way people lived and live in them... The pictures—paintings, engravings, posters, building designs, caricatures, and photographs—are superb."—The New Yorker
"Makes you feel as though you had always previously walked through an English town with your eyes shut tight."—Tony Hiss, The New York Times Book Review
93 b/w + 32.5 color illus. $39.95

The Oak Spring Garden Library
Volume II: An Oak Spring Pomona
Sandra Raphael
The second in a series of volumes describing selections from the Oak Spring Garden Library, An Oak Spring Pomona looks at one hundred books and manuscripts about fruit, with illustrations taken from some of the most beautiful books on the subject. 100 b/w + 70 color illus. $60.00
Also available: Volume I: An Oak Spring Sylva. "Leads the contemporary garden aficionado and reader back to the pleasure of primary sources."—Paula Deitz, The New York Times Book Review 100 duotones + 20 color illus. $40.00
Distributed for the Oak Spring Garden Library, Upperville, Virginia

Out of Place
Restoring Identity to the Regional Landscape
Michael Hough
Why do modern cities, suburbs, and industrial and farming landscapes all tend to look alike despite their regional settings? Using case studies drawn from all parts of the world—from Turkey and Hong Kong to Kentucky and Oregon—a landscape architect argues that the monotony of the modern landscape is a reflection of indifference on the part of society to the diversity inherent in ecological systems and in human communities.
"The wonderful thing about Michael Hough's approach is its depth, below surface appearances, into the truly vital and shaping realms of process, place, ecology, and aesthetic philosophy."—Jane Jacobs 174 illus. $35.00

The Italian Renaissance Garden
From the Conventions of Planting, Design, and Ornament to the Grand Gardens of Sixteenth-Century Central Italy
Claudia Lazzaro
photographs by Ralph Lieberman
In this beautiful book Claudia Lazzaro reconstructs the splendid architectural gardens of sixteenth-century Italy. Using an abundance of literary and visual sources, Lazzaro establishes the conventions of planting, design, and ornamentation and discusses in detail some of the best-preserved grand gardens.
"Rigorous in its detail, lyrical in style."—Publishers Weekly 190 b/w + 80 color illus. $55.00

The American Country House
Clive Aslet
A richly illustrated, richly entertaining social and architectural history of the great country houses built with American industrial fortunes from the end of the Civil War until 1940—from the Vanderbilts' stupendous Biltmore and the Rockefellers' Kykuit to the Du Ponts' museum-like Winterthur and William Randolph Hearst's legendary San Simeon. 75 b/w + 200 color illus. $45.00

The Architect and the American Country House, 1890-1940
Mark Alan Hewitt; architectural photographs by Richard Cheek
This stunning book by a practicing architect looks at the creation of some of America's most famous country houses and their gardens.
Mark Alan Hewitt explains the social and economic forces that spawned their creation and the architectural theory and building technology that influenced their design.
"Thoroughly researched and cogently argued....[It] promises to become the foundation for all future research."—Robert A.M. Stern 250 b/w + 60 color illus. $55.00

Borderland
Origins of the American Suburb, 1820-1939
John R. Stilgoe
"A historian of American landscape recounts the creation of residential suburbs in the ever-shifting borderlands between cities and farms. His book offers readers all over this country the pleasure of seeing familiar places with new eyes."—The New Yorker
"Brilliantly written and beautifully illustrated....The definitive account of the emergence of a distinctive American suburban landscape."—Robert Fishman, The Chicago Tribune 198 illus. $18.95

SCHOOL OF LANDSCAPE ARCHITECTURE
GRADUATE PROGRAMS

The Master of Landscape Architecture program at Louisiana State University provides preparation for a professional career in landscape architecture.

The program offers concentrations in Geographic Information Systems and Computer-Aided Design, Design Theory and Meaning, and Human Ecology. Study tracks are offered for either a first professional degree or study beyond the accredited degree program.

L.S.U. is the center of academic research and advanced studies in Louisiana. The MLA program at Louisiana State University has been selected for The Southern Academic Common Market offering students from five southern states resident tuition. L.S.U. is located in the heart of Louisiana's rich historical, cultural, and natural landscape. Study opportunities are available to accommodate a range of individual student interests.

Assistantships and other financial aid are available to qualified applicants.

GRADUATE STUDY IN LANDSCAPE ARCHITECTURE
AND ENVIRONMENTAL PLANNING

UTAH STATE UNIVERSITY

The Department provides educational opportunities for individuals interested in careers in site planning, design, and management of town, rural, and wilderness environments. The Department offers two graduate degrees: Master of Landscape Architecture and Master of Science in Town and Regional Planning.

MLA - Advanced Professional Degree: A two year program of self-directed study requiring a high degree of personal and professional motivation. BLA required for admission.

MLA - First Professional Degree: A three-year accredited program available for candidates with a previous baccalaureate in a field other than landscape architecture.

MS - A two year program emphasizing planning for large areas with dispersed populations and an economic base in agriculture, energy development, and natural resources.

Formal areas of specialization are provided in conjunction with other colleges and departments on campus. These are: Land Rehabilitation/Revegetation, Water Resources, Public Lands and Recreation, Small Town Rehabilitation, Visual Assessment, and Academic/Research Practice.

For complete program descriptions and application, write to: Graduate Program Coordinator
LAEP Department
Utah State University
Logan, Utah 84322-4005

Application deadline for scholarship consideration is January 15.

Interdisciplinary.  
Timely.  
Topical.

Research & Exploration complements single-subject research journals with an emphasis on synthesis and superior presentation. This peer-reviewed quarterly provides the best in geographic scholarship — broadly defined — to scientists, educators, and policymakers worldwide.

In addition to articles presenting fieldwork, methodology, and application, Research & Exploration's flexible format includes commentary and rejoinder, opinion essays, and reviews of this year's books. This lively, engaging format is designed to bridge disciplinary boundaries and stimulate genuine communication among scientists. Studies emphasizing patterns of change and movement, biodiversity and quality-of-life issues, whether practical or theoretical in approach, are selected from a variety of disciplines; contributions from corporate and governmental analysts appear alongside reports on university or grant-funded research.

Please send my trial issue of Research & Exploration and enroll me as a subscriber. I've checked my preferred method of payment below.

The Leopold collection

The River of the
Mother of God
and Other Essays by
Aldo Leopold
Edited by Susan L. Flader
and J. Baird Callicott

"Aldo Leopold was a rare and wonderful combination of
prophet, professor, civil servant, and muddy-boot lover of
the land. . . . The River of the Mother of God and Other
Essays reinforces the view that he was far ahead of his time.
. . . Flader and Callicott have done an excellent job of giving
public voice to a pioneer environmentalist."
—Brad Knickerbocker, Christian Science Monitor

These sixty essays by the author of the environmental
classic A Sand County Almanac range from "A Tramp in
November," penned in 1904 when Leopold was a seve-
ten-year-old schoolboy, to "The Ecological Conscience,"
written in 1947, the year before his death. To traverse the
terrain from "The Varmint Question" (1915), in which wolves
and grizzlies are deemed expendable, to "Threatened Spe-
cies" (1936), which calls explicitly for their protection and
restoration, is to observe not only the increasing breadth and
penetration of Leopold's own thought but also the matura-
tion of the field of ecology in which he was so seminal a
figure. cloth $24.95

New in paperback
Aldo Leopold
His Life and Work
Curt Meine

Aldo Leopold, His Life and Work is a portrait of
a progressive, modern thinker and activist coming to
terms with the realities of humankind's recent treatment of
natural systems. Leopold is unique in the degree to
which his life and work continue to exert influence on
those who are concerned with the quality of our natural
environment. This book is written for those who wish to
understand this unusual and gifted man better, as well as
for those who wish to gain greater insight to the evolution
of the American landscape.
"For those who love Leopold, it would be a mistake not to
own this volume."—Charles E. Little, Wilderness
text $19.95 cloth $29.50

Game Management
Aldo Leopold

"Game management is as usable today as it was the day
it came off the press. . . . The basic concepts of ecology
and management presented by Leopold have only been
strengthened by scientific progress in the intervening
years. Every student of wild animals should own this
classic treatment."
—Robert A. McCabe, University of Wisconsin–Madison
paper $14.00

A Companion to
A Sand County
Almanac
Interpretive and Critical Essays
Edited by J. Baird Callicott

The first sustained study of Leopold's seminal book as a
work of art, philosophy, and social commentary. It
includes biographical sketches of Leopold, an analysis of
his correspondence leading to the writing of the Almanac,
and a literary study of the book. "An indispensable
collection."—John Murray, Bloomsbury Review

Quantitative Methods in Landscape Ecology
The Analysis and Interpretation of Landscape Heterogeneity
Edited by M.G. Turner and R.H. Gardner,
Oak Ridge National Laboratory, Oak Ridge, TN
This book is the first comprehensive reference for landscape ecologists that discusses modern quantitative approaches to the analysis of spatial heterogeneity. It provides a conceptual framework and illustrates potential applications for such methods as pattern analysis, spatial statistics, fractals, spatial modeling, and extrapolation across scales. Each technique is discussed in sufficient detail so as to be adaptable to a variety of research questions.

(Ecological Studies, Volume 82)

Just Released!
Landscape Boundaries
Edited by Andrew J. Hansen, Oregon State University, Newport, OR; and Francesco di Castri, UNESCO
Landscape Boundaries examines the effect of ecotone patterning on community diversity and landscape functioning. Ecotones (transition zones between ecosystems) define ecosystem boundaries and may control the flow of energy, material, and organisms between ecosystems. This volume explores the role of ecotones in controlling these flows thereby influencing landscape functioning. It synthesizes existing theory, evaluates central hypotheses relative to empirical and simulating data, and puts forth new hypotheses. This book is among the first to integrate the ecotone concept into modern ecological theory and to examine implications for management.

1991/395 pp., 90 illus./Hardcover $98.00

(Ecological Studies, Volume 92)

Landscape Ecology
Theory and Application
Student Edition
By Z. Naveh, Tech. Israel Inst. of Technology, Haifa, Israel and A. S. Lieberman, Cornell Univ., Ithaca, NY
This paperback edition of the first English-language monograph on the interdisciplinary, global human ecosystem science of landscape ecology is ideally suited for use as a text in courses on ecology-based land and resources planning, environmental and regional planning, natural resources policy and management, and international development.

1990/356 pp./77 illus./Softcover $49.00
ISBN 0-387-97169-6

Changing Landscapes:
An Ecological Perspective
Edited by L.S. Zonneveld, Int. Inst. for Aerospace Survey & Earth Sciences, Enschede, The Netherlands; and R.T.T. Forman, Harvard University, Cambridge, MA
This book provides a timely overview of recent developments and current concepts in the rapidly expanding field of landscape ecology. Written by an international cast of researchers, it integrates natural and human processes affecting the distribution of energy, materials, and living organisms in the changing mosaics of landscapes around us. It illustrates how different scales of time and space contribute to our understanding of ecosystem patterns and development, putting landscape ecology in perspective with traditional biological and geographical theories and modeling approaches.

1990/286 pp./78 illus./Hardcover $69.50

Forthcoming title . . .
Reintegrating Fragmented Landscapes: A Case Study of the Australian Wheat Belt
By K. J. Hobbs and D. A. Saunders, CSIRO, Division of Wildlife & Ecology, Midland, Western Australia
Reintegrating Fragmented Landscapes examines the serious problem of landscape deterioration due to extensive agricultural development. The book focuses on a detailed study made of the wheat belt of Western Australia. The degradation of the landscape is examined with respect to the loss of animal diversity, vegetation, and soil cover. The authors consider integrated land use planning from the overlapping perspectives of agricultural production, water use, and the conservation of nature.
