

The California Garden **Jere Stuart French**

The first truly comprehensive account of garden design in the Golden State, THE CALIFORNIA GARDEN describes the magic and beauty of the livable outdoor rooms that mark this unique and recognizable regional form. From large turn-of-the-century estates to contemporary city lots, THE CALIFORNIA GARDEN provides an intimate and original view of private gardens and the landscape architects that created them. Lavishly illustrated with color photos and original plans, it shows how a splendid climate, a rich history and a wealth of creative talent produced the California garden heritage.

Published by the Landscape Architecture Foundation.

256 pages, 80 color photos, 100 b&w illus., list of public gardens.

PLANNING THE TWENTIETH-CENTURY AMERICAN CITY

EDITED BY MARY CORBIN SIES
AND CHRISTOPHER SILVER

The authors reassess the history of planning ideas and the impact of the planning process on specific neighborhoods, regions, and urban communities in the United States since 1900. Focusing on large and small metropolitan areas in all regions of the country, they analyze a wide range of planners, issues, and influences to explain how the twentieth-century built environment has developed.

52 illustrations, \$24.95 paperback

INVENTING TIMES SQUARE

Commerce and Culture at the
Crossroads of the World

EDITED BY WILLIAM R. TAYLOR

"No other work does so much to put Times Square into historical perspective both as a geographical space—an actual entity—and as a cultural symbol of central importance."—Lawrence W. Levine, author of *Highbrow-Lowbrow: The Emergence of Cultural Hierarchy in America*

40 illustrations, \$19.95 paperback

The Road and American Culture

Drake Hokanson, Series Editor
George F. Thompson, Series Director

THE NATIONAL ROAD

EDITED BY KARL RAITZ

The National Road was America's first interstate highway, established by an act of Congress in 1808. This interdisciplinary volume explores the importance of the National Road in American history and its influence on culture and the national imagination.

135 illustrations, \$34.95 hardcover

A GUIDE TO THE NATIONAL ROAD

EDITED BY KARL RAITZ

This companion volume to *The National Road* is a traveler's guide to the nation's first federally funded highway—the historic route from Baltimore to America's heartland.

289 illustrations, \$34.95 hardcover

Creating the North American Landscape

Gregory Conniff, Bonnie Loyd,
Edward K. Muller, and David Schuyler,
Consulting Editors

APOSTLE OF TASTE

Andrew Jackson Downing,
1815-1852

DAVID SCHUYLER

Apostle of Taste is the first full-length biography of Downing, the horticulturist, landscape gardener, and prolific writer on architecture who shaped middle-class taste in the United States prior to the Civil War.

107 illustrations, \$35.95 hardcover

UNPLANNED SUBURBS

Toronto's American Tragedy,
1900 to 1950

RICHARD HARRIS

In this original and intensive study of Toronto, Richard Harris shows that prewar suburbs were socially and ethnically diverse, with a significant number of lower-income North American families making their homes on the urban fringe.

84 illustrations, \$39.95 hardcover

Ecological Design

Sim Van der Ryn and Stuart Cowan

The authors weave together case studies, personal anecdotes, images, and theory to provide a thorough treatment of the concept of ecological design. In the process, they present and explain a series of design principles that can help build a sustainable world with increased efficiency, fewer toxics, less pollution, and healthier natural systems.

Conservation Design for Subdivisions

A Practical Guide to Creating Open Space Networks

Randall Arendt

Natural Lands Trust, American Planning Association, American Society of Landscape Architects

A practical handbook that explains how to implement new ideas about land-use planning and environmental protection in designing new residential developments. Illustrated with site plans, floor plans, photographs, and renditions of houses and landscapes, it describes a series of simple and straightforward techniques that allow for land-conserving development.

11 x 8 1/2 • 160 pages • figures, photographs, site plans, index

Land Use in America

Henry L. Diamond and Patrick F. Noonan

Foreword by Laurance S. Rockefeller

Lincoln Institute of Land Policy

"Guided by the principle that planning minimizes the destruction of natural resources, the authors and the contributors ... offer a measured and encompassing analysis of how land should be used. The issues are varied: deteriorating agricultural land, toxic water sources, suburban sprawl ...[and] burgeoning disaster relief....This lodestone book fulfills its lofty ambition—it is a great source for understanding this complex, sensitive subject."

**KRIEGER PROUDLY ANNOUNCES
 THE LATEST EDITION OF**

DISEASES OF TURFGRASSES

by Houston B. Couch

Third Edition 1995

ISBN 0-89874-211-0 424 pp. \$84.50

Long recognized as the basic reference on turfgrass pathology, *Diseases of Turfgrasses* has been updated for the first time in twenty years. The new edition contains the most recent comprehensive treatment of diseases of turfgrass and is the most complete reference currently available.

The book has been designed as a practical manual for all those engaged in turfgrass management and is specifically directed to plant pathologists and agronomists. It can be used both as a thorough text and scientific reference manual.

ABOUT THE AUTHOR:

Houston B. Couch, Ph.D., is professor of plant pathology at Virginia Polytechnic Institute and State University. He has been conducting research and writing articles on the nature and control of turfgrass diseases for 40 years. His association with and service to professional organizations and societies includes: Educational Advisory Council of the Golf Course Superintendents Association of America; president of the Northeastern and Potomac Divisions of the American Phytopathological Society; chairman of the Steering Committee of the Eastern Conference on the Ecology of Root Infecting Microorganisms; and chairman of the Committee for the Establishment of the National Registry of Practitioners in Plant Pathology.

Completely revised for the first time in 20 years!

- Strong emphasis on diagnosis
- Over 250 photographs, including 180 in color illustrating the full range of symptoms for all major diseases
- Latest facts on integrated disease control using cultural practices, resistant varieties, and specific biological control products and pesticides
- Money-saving tips on selection and use of fungicides
- Most respected reference in its field

Write or call for our FREE biological and physical sciences catalog

Domestic orders add \$6.00 for the first book, \$1.50 each additional for shipping and handling. Foreign shipping costs available upon request.

**SCHOOL OF LANDSCAPE ARCHITECTURE
LOUISIANA STATE UNIVERSITY
GRADUATE PROGRAM**

The Master of Landscape Architecture program at Louisiana State University provides students with the opportunity to explore the role of nature, culture, and individuals in shaping the built environment through the activity of design. The Lower Mississippi Valley, a rich cultural and natural region, serves as a laboratory for examination of the processes of landscape evolution and design.

LSU is a Research University 1, placing it in the top 2 percent of the nation's colleges and universities. The MLA program belongs to the Southern Academic Common Market, offering students from five southern states resident tuition. Assistantships and other financial aid are available to qualified applicants.

Study tracks for students with degrees in design fields and for those seeking a first professional degree with bachelor's degrees from other fields accommodate a range of individual student interests.
