The Master of Landscape Architecture program at Louisiana State University provides students with the opportunity to explore the role of nature, culture, and individuals in shaping the built environment through the activity of design. The Lower Mississippi Valley, a rich cultural and natural region, serves as a laboratory for examination of the processes of landscape evolution and design.

LSU is a Research University I, placing it in the top 2 percent of the nation's colleges and universities. The MLA program belongs to the Southern Academic Common Market, offering students from five southern states resident tuition. Assistantships and other financial aid are available to qualified applicants.

Study tracks for students with degrees in design fields and for those seeking a first professional degree with bachelor's degrees from other fields accommodate a range of individual student interests.

For 23 years, the Conway School of Landscape Design has produced graduates with a commitment to land stewardship and environmentally sound design. Conway’s intensive 10-month Master of Arts program applies classroom learning to contracted projects at residential and community scales. The curriculum incorporates technical, graphic, and communication skills with ecological theory. Design and planning approaches are revealed in the process of problem-solving. This hands-on approach helps students acquire necessary professional skills as well as a capacity for life-long learning. In the process, they develop and present designs and plans, under contract and at cost, for private residences, non-profit organizations and institutions, towns and cities, and regional planning agencies. Classes are small, the pace is accelerated, and the rural setting is unique.

The Conway School attracts individuals who are highly motivated, self-directed learners with a commitment to environmental sensitivity. Many are changing careers or building on previous experience. Entering students must have a bachelor’s degree (with liberal arts courses); classes typically include a wide range of ages, work experience, and academic backgrounds. Deadline for applications from prospective students is March 15th.

Conway brings in guest teachers throughout the year to supplement core instruction. Faculty and practitioners in environmental and design fields who are interested in spending a week at Conway teaching classes, leading field trips, and evaluating student work are invited to send a letter of interest by January 15, 1997.

Open house and orientation sessions:
Saturday, December 7, 1996
Saturday, February 22, 1997

Interpreting Environments
Tradition, Deconstruction, Hermeneutics
BY ROBERT MUGERAUER
In this pioneering book, Mugerauer seeks to make deconstruction and hermeneutics accessible to people in the environmental disciplines, including architecture, planning, urban studies, environmental studies, and cultural geography, demonstrating each methodology through a case study.
47 b&w photos
$14.95 paperback, $35.00 hardcover

Humanature
BY PETER G O I N
Goin challenges us to intelligently consider the far-reaching ways in which humans are reshaping nature on a planet-wide scale. His striking photographs, the vital core of this book, provide convincing confirmation of the extent to which people and nature have become a continuum—humanature.
Goin is author of Nuclear Landscapes and Stopping Time.
91 color, 32 b&w photos
$29.95 paperback, $60.00 hardcover

Landscape in America
EDITED BY GEORGE F. THOMPSON
“A virtual ‘who’s who’ of landscape commentary . . . I feel as if I have just read a classic.” — John Jakle
“...a brilliant contribution to the fast-emerging field of environmental culture.” — William Howarth
George F. Thompson, President of the Center for American Places, brings together 19 of America’s leading writers, artists, and scholars who offer a distinctively American perspective on what landscape is, means, and represents.
15 color, 10 duotone, 55 b&w photos

GARDEN AND GROVE
The Italian Renaissance Garden in the English Imagination, 1600-1750
JOHN DIXON HUNT
“This is a major work . . . Once picked up, the book cannot be put down, for it is an exciting exegesis of the continuing Italian influence upon English garden art.” — Country Life
With a wealth of literary and visual materials previously untapped, Hunt provides a new history of an intriguing and vital phase of English garden history. Not only does he suggest the centrality of the garden as a focus for many social, aesthetic, political, and philosophical ideas but he argues that the so-called English landscape garden before “Capability” Brown owed much to a long and continuing emulation of Italian Renaissance models.
288 pages, 113 illus. $24.95 paper.

RE-ISSUED IN PAPERBACK
SHADE AND ORNAMENTAL TREES
Their Origins and History
HUI-LIN LI
Tying together human migration with the spread of the cultivation of trees, the author has written a fascinating and informative book that tells the story of tree cultivation from ancient to modern times. The dispersion and variation of the more important trees is, in a sense, the story of the rise of civilization, for civilized societies have almost always cultivated trees for ornamentation and shade.
Some of the subjects covered include conifers, flowering trees, shade trees, and the continents of Europe, Asia, and North America as centers of origin for trees. In addition, the volume provides a scientific and common-name index.
288 pages, 82 illus. $15.95 paper.
THE MOTEL IN AMERICA
JOHN A. JAKLE, KEITH A. SCULLE, AND JEFFERSON S. ROGERS
There have been motels in America almost as long as there have been cars. From the auto camps and cottage courts of the early automobile age, to the Art Deco, Spanish mission, and other distinctively styled motels of the 1930s through the 1960s, to the uniform franchises of today, motorists and their cars have found cheap, convenient, and uniquely American lodgings on the road. In The Motel in America, John Jakle, Keith Sculle, and Jefferson Rogers take an informative and entertaining look at the history, architecture, and business of motels in the United States. As did Jakle and Sculle's acclaimed The Gas Station in America, this book explores the effect on American culture as citizens became motorists.

THE MOUNTAIN WEST
Interpreting the Folk Landscape
TERRY G. JORDAN, JON T. KILPINEN, AND CHARLES F. GRITZNER
In this groundbreaking volume, Terry Jordan and his co-authors look to the log folk buildings of the Mountain West, from New Mexico to Alaska, to explain why the West is “the West.” Arguing that artifacts such as dwellings, barns, and fences can, if correctly interpreted, reveal much about the origins and character of the regional culture, they set forth not only the first comprehensive description and analysis of Western folk architecture but also a systematic explanation of the culture of the West.

BELONGING TO THE WEST
ERIC PADDOCK
In 67 full-color photographs, Paddock offers a view of his own West: the landscape of Colorado. Without sentimentality, Paddock's photographs suggest not only the aspects of western landscape and culture that have been lost but also those that remain—and why they must be respected and preserved.

Taking Measures Across the American Landscape

Essays, Drawings, and Commentary by James Corner; Photographs by Alex S. MacLean

This book combines breathtaking aerial photographs and exquisite map-drawings of the American landscape with thoughtful essays that explore how various cultures have forged the landscapes in different regions of the country and what the possibilities are for future landscape design.

"Presents the familiar American landscape from a different and enthralling angle."
—Boston Globe

13 b/w + 115 color illus. $45.00

Invented Cities

The Creation of Landscape in Nineteenth-Century New York and Boston

Mona Domosh

In this fascinating exploration of the strikingly different landscapes of Boston and New York, Domosh cites historical, social, and economic reasons for the shaping of each city in the nineteenth century.

A selection of Architects' and Designers' Book Service
79 illus. $35.00

A Sense of Place, a Sense of Time

John Brinckerhoff Jackson

"This godfather of American landscape studies combines the historian's long view with a photographer's eye. His elegant and lucid voice of sanity is just as likely to be calling out from the parking garage as the wilderness."—Hungry Mind Review
Winner of the 1994 PEN/Spielvogel-Diamonstein award for the best collection of essays
62 illus. $22.00

GARRETT ECKBO

Modern Landscapes for Living

Marc Treib and Dorothée Imbert

One of the central figures in modern landscape architecture, Garrett Eckbo (b. 1910) has been a major influence throughout an active career spanning five decades. While most of the early American designers concentrated on the private garden and the corporate landscape, Eckbo's work demonstrated innovative design ideas in a social setting. This engagement with social improvement has stayed with Eckbo throughout his life. This elegant book includes more than 100 of Eckbo's designs.

$39.95 cloth, color & b/w illustrations

ACCENTS AS WELL AS BROAD EFFECTS

Writings on Architecture, Landscape, and the Environment, 1876-1925

Mariana Griswold Van Rensselaer

Selected and Edited by David Gebhard

Mariana Griswold Van Rensselaer is highly regarded for her biography of the nineteenth-century architect Henry Hobson Richardson. Less well known are her writings on architecture, decorative art, gardening, and landscape design, works that provide a rare view of cities and rural environments in turn-of-the-century America. Gebhard brings Van Rensselaer's significant writings together for the first time.

"An eye-opening reintroduction."—Preservation

$45.00 cloth, illustrated
Handbook of Landscape Architectural Construction

The Handbook of Landscape Architectural Construction is a must-have desk reference for every practicing landscape architect. This four volume series offers comprehensive coverage of the practical elements of executing a landscape design—processes, procedures and materials—written by experts specializing in construction.

Handbook of Landscape Architecture Volume I
Maurice Nelischer, Editor
Published by the Landscape Architecture Foundation, Washington, DC
1985, 385 pp., tables, charts, graphs, maps and details
Member Price $40.00
Stock #609B

Volume I: The Construction Process
This first volume is a practical review of the major steps of the construction process, from plans through legal concerns. It includes how-to's for many necessary calculations, handy reference tables, sample contracts and much more.

Table of Contents
1 Preparation of Construction Plans
2 Landscape Grading Design
3 Layout and Dimensioning
4 Surveying and Measuring
5 Site Construction Details
6 Technical Aspects of Planting
7 Surface Water Drainage
8 Specifications
9 Construction Observation and Evaluation
10 Metric Practice
11 Design/Build
12 Legal Concerns for the Landscape Architect

Handbook of Landscape Architecture Volume II
Maurice Nelischer, Editor
Published by the Landscape Architecture Foundation, Washington, DC
1988, 322 pp., tables, charts, graphs, maps, drawings and details
Member Price $40.00
Stock #609C

Volume II: Site Works
Site Works gathers a wide range of construction-related information into one resource. It includes informative, practical descriptions of many of the common problems faced by designers, from vehicle traffic to the particulars of designing sports facilities.

Table of Contents
1 Vehicular Circulation
2 Design for the Handicapped
3 Site Utilities
4 Sports Facilities
5 Microcomputers and Landscape Architecture
6 Retaining Walls
7 Pedestrian and Bicycle Circulation
8 Channels and Ponds

Landscape Architecture Bookstore, 4401 Connecticut Ave NW, Washington, DC 20008
Applications are invited for appointment to the Elisabeth Murdoch Chair of Landscape Architecture in the Faculty of Architecture, Building and Planning, which will be vacant from January 1997 following the retirement of Professor David Yencken.

Applicants should have an international reputation in Landscape Architecture and have a distinguished research record in Landscape Architecture or a closely related discipline.

The total remuneration package is in the vicinity of AUD96,000. In addition, provisions exist for four weeks annual leave and for study leave. All academic staff may earn additional personal income from external consulting subject to the conditions approved by the Council of the University. Some elements of the remuneration package may be salary packaged.

Further information about the position, application procedure, conditions for outside work, superannuation, travel and removal expenses, housing assistance and conditions of appointment, is available from the Registrar. This information is also available on the Internet: http://www.unimelb.edu.au/ExecServ/Seniorapp/index.htm

All correspondence (marked "PERSONAL AND CONFIDENTIAL") should be addressed to the Registrar, The University of Melbourne, Parkville, Victoria 3052, Australia.

Telephone enquiries: (+61 3) 9344 7528 (Lydia Simonow). Secure facsimile: (+61 3) 9344 6897. Email: lydia_simonow_exec.serv@pc.unimelb.edu.au

Enquiries of an academic nature may be directed to the Dean, Faculty of Architecture, Building and Planning in the first instance.

Telephone enquiries: (+61 3) 9344 7203 (Professor Ross King). Secure facsimile: (+61 3) 9347 2514. Email: Ross_King_ArchPlan@muwayf.unimelb.edu.au

Applications close on 31 March, 1997.

The Council reserves the right to make no appointment or to fill the Chair by invitation at any stage.

ASSISTANT/ASSOCIATE PROFESSOR POSITIONS
BEGINNING ACADEMIC YEAR 1997-98

Landscape Architectural Design

Two assistant/associate professor positions are available beginning in academic year 1997-98 for persons qualified to offer graduate-level instruction in landscape architectural design plus courses in a strong secondary specialty in contemporary landscape history, Asian landscape history, representation, or advanced technology. These full-time positions may be filled for a fixed initial term, normally of three years, with responsibilities for teaching, scholarship, and administration. Candidates should have some teaching and professional practice experience and they should have a proven record of scholarly productivity in the fields of history, representation, or technology.

Landscape Ecology/ Landscape Architecture

An assistant professor position is available beginning in academic year 1997-98 for a person qualified to offer graduate-level instruction in freshwater/landscape ecology as well as in landscape architecture/landscape planning. This full-time position may be filled for a fixed initial term, normally of three years, with responsibilities for teaching and scholarship. Candidates should have a record of scholarly research productivity on land-water interactions, an ability to relate research to the design professions, and some teaching experience. A Ph.D., a professional degree in landscape architecture/planning, and published research in ecology with a focus on streams, rivers, wetlands, or lakes are preferred but not required.

Applications are invited before 31 January 1997 on the application forms available from: Office of Faculty Planning, Harvard University Graduate School of Design, 48 Quincy Street, Cambridge, MA 02138; Tel: (617) 495-5409; Fax: (617) 496-5310. Applicants should also include non-returnable copies of their most relevant publications with their applications. Harvard University is an Equal Opportunity/Amortitative Action Employer.
Landscape Research

*Landscape Research* is distinctive in combining original research papers with reflective critiques of landscape practice. Contributions to the journal appeal to a wide academic and professional readership, and reach an interdisciplinary and international audience. Whilst unified by a focus on the landscape, the coverage of *Landscape Research* is wide ranging. Topic areas include: environmental design • countryside management • ecology and environmental conservation • land surveying • human and physical geography • behavioural and cultural studies • archaeology and history.

1997 - Volume 22. 3 issues. ISSN 0142-6397.

Online and Increasing to 6 issues in 1997!

Journal of Environmental Planning and Management

The *Journal of Environmental Planning and Management* is both international and interdisciplinary in its scope and content. For readers, *JEPM* offers the very best papers on environmental research, policy evaluation and practice from around the world. For authors, *JEPM* offers a fast and constructive review process and accepted papers are normally published within 12 months of first submission. *JEPM* is the foremost outlet for readers, researchers and others seeking a truly international and interdisciplinary perspective.

To view the *Journal of Environmental Planning and Management* online, please connect to [http://www.catchword.co.uk](http://www.catchword.co.uk)

1997 - Volume 40. 6 issues. ISSN 0964-0568. Online: ISSN 1360-0559.

Journal of Urban Design

Launched in 1996, the *Journal of Urban Design* is a scholarly international journal which provides a new forum, bringing together those contributing to this re-emerging discipline and enabling researchers, scholars, practitioners and students to explore its many dimensions. The journal publishes original articles in specialised areas such as: townscape and urban aesthetics • urban structure and form • urban history, preservation and conservation • urban regeneration • environmental psychology and perception • local and regional identity • design control and guidance • city centre revitalisation • safer environments and cities • property development • housing and residential development • greening urban design • cultural change and urban form • women and the urban environment • practice and implementation.

1997 - Volume 2. 3 issues. ISSN 1357-4809.
