Walter Burley Griffin in America
Photographs and Essay by Mati Maldre
Essay, Catalog, and Selected Bibliography by Paul Kruty

The ideal introduction to Griffin.
—Journal of Society of Architectural Historians

A gem!... Nothing comparable to this book exists today. The plates are a splendid photographic achievement, the essays are very valuable, and the catalog of Griffin’s American work is a marvel.”—H. Allen Brooks, author of Prairie School Architecture: Studies from the Western Architect.

One of the most original architects the United States has produced, Walter Burley Griffin worked in the shadow of his early colleague and employer, Frank Lloyd Wright. After breaking away to establish his own practice, Griffin won an international competition to design the proposed new Australian capital city of Canberra, where he is justly famous.

Includes a chronological catalog of standing buildings, a list of demolished works, a location guide, and a selected bibliography. Illustrated with nearly 200 photographs.

Cloth, $49.95
Now available!

"This richly researched history will appeal not only to admirers of Frank Lloyd Wright, but to everyone interested in the interplay of politics, economics, culture, and public space in twentieth-century urban America. This is popular history at its best."
—Paul Boyer, Merle Curti Professor of History, University of Wisconsin-Madison

FRANK LLOYD WRIGHT’S MONONA TERRACE
THE ENDURING POWER OF A CIVIC VISION

David V. Mollenhoff & Mary Jane Hamilton

"What a fascinating book Mollenhoff and Hamilton have written. Monona Terrace is one of the most controversial and exciting buildings my grandfather ever designed. Their wonderfully detailed and lavishly illustrated book is a joy to read. I know my grandfather would be extremely pleased."
—Eric Lloyd Wright, architect

"I can say without reservation that the Monona Terrace project is one of Wright's most original and important designs.... It is important for the study of American urbanism and city planning in general; for what it reveals of the intimate relations between architecture and politics in the twentieth century; and for Wright's own involvement in and contribution to these questions."
—Neil Levine, Emmet Blakney Gleason Professor of Fine Arts, Harvard University, author of The Architecture of Frank Lloyd Wright

With sumptuous illustrations and superb documentation, the extraordinary story of the epic fifty-nine-year civic battle to build one of Frank Lloyd Wright's most important designs is finally told in Frank Lloyd Wright's Monona Terrace: The Enduring Power of a Civic Vision, by David Mollenhoff and Mary Jane Hamilton.

Opened in the summer of 1997 as a convention and community center, Monona Terrace was first conceived by Wright in 1938 and resulted in ten designs, thousands of drawings, five local referenda, ten lawsuits, and several acts of the state legislature. Mollenhoff and Hamilton provide the definitive history of the building's design, the tempestuous relationship of Wright to his hometown of Madison, and the community leaders and activists who rallied to oppose or support the project. Drawing from the Frank Lloyd Wright Archives, thousands of newspaper accounts, extensive government records, and dozens of interviews, the book also features more than 300 color illustrations, including many published here for the first time.

David V. Mollenhoff is the author of the award-winning book, Madison: A History of the Formative Years. Mary Jane Hamilton is a well-known Wright scholar, author, and curator.

Lobsticks and Stone Cairns
Human Landmarks in the Arctic
Richard C. Davis, editor

These stories of adventurers, military officers, authors, guides, culture heroes, police, traders, and even the occasional charlatan, are offered in a symphony of Northern voices. The efforts of these men and women bring Arctic history and geography to life, from the sixteenth century to modern times, in this generously illustrated book.

SCHOOL OF LANDSCAPE ARCHITECTURE
LOUISIANA STATE UNIVERSITY
GRADUATE PROGRAM

The Master of Landscape Architecture program at Louisiana State University provides students with the opportunity to explore the role of nature, culture, and individuals in shaping the built environment through the activity of design. The Lower Mississippi Valley, a rich cultural and natural region, serves as a laboratory for examination of the processes of landscape evolution and design.

LSU is a Research University 1, placing it in the top 2 percent of the nation’s colleges and universities. The MLA program belongs to the Southern Academic Common Market, offering students from five southern states resident tuition. Assistantships and other financial aid are available to qualified applicants.

Study tracks for students with degrees in design fields and for those seeking a first professional degree with bachelor’s degrees from other fields accommodate a range of individual student interests.

GRADUATE STUDIES IN LANDSCAPE ARCHITECTURE AT THE UNIVERSITY OF WISCONSIN-MADISON

The Department of Landscape Architecture is located on the campus of the University of Wisconsin-Madison. The graduate student in Landscape Architecture has access to a wide range of facilities and scholars from nearly every discipline, reflecting the University of Wisconsin-Madison’s worldwide reputation for education quality. The Department offers both a Master of Science (MSLA) and a Master of Arts (MALA) in Landscape Architecture.

Some 3700 courses are offered by more than 125 departments located on the Madison campus. Students take advantage of nationally ranked campus libraries, the resources of the State Historical Society of Wisconsin; the facilities of the Madison Area Computing Center; the Center for Restoration Ecology at the University Arboretum; the collections for the Elvehjem Museum of Art; and the resources of Wisconsin state government.

The graduate program in Landscape Architecture is based on the premise that research and teaching should generate and synthesize new information for the purpose of raising the performance level in landscape planning, management, and design. The graduate program is particularly known for its instruction and research in cultural resource preservation and landscape history; plant community assessment, management, and restoration; and the integration of cultural and natural resources in developing solutions for landscape problems.

Visions of Paradise
Glimpses of Our Landscape’s Legacy
John Warfield Simpson
“This is an exceptionally readable work on the American attitudes toward pristine and altered landscapes which pioneers encountered, settled in, modified, and moved westward from during the past three centuries.”
—Michael Barbour, University of California, Davis
$35.00 cloth, illustrated

Shaping the Sierra
Nature, Culture, and Conflict in the Changing West
Timothy P. Duane
“An inspiring and instructive text. It’s a massive accomplishment, with a wealth of historical, natural, and regional political information refracted through cutting edge analysis and theory.... The reach of Duane’s study corrals far more than the Sierra Nevada. It will be of use to those who wrestle with the dilemmas of economy and ecology everywhere.”
—Gary Snyder, author of Mountains & Rivers Without End
$50.00 cloth, illustrated

The California Landscape Garden
Ecology, Culture, and Design
Mark Francis and Andreas Reimann
Illustrations by Yan Nascimbene
Here the beauty, resources, and natural processes of the California landscape are brought to the home garden. The authors connect history, culture, region, and design to help us understand how California and its human population have evolved historically and how individuals today can make a difference in the state’s future in their own backyards.
$50.00 cloth, $29.95 paper, illustrated

Natural Enemies Handbook
The Illustrated Guide to Biological Pest Control
Mary Louise Flint and Steve H. Dreistadt
Photographs by Jack Kelly Clark
“Includes plenty of information useful to gardeners everywhere.”—Organic Gardening
This book is the best-ever practical guide to the identification and biology of beneficial organisms that control pests.
$35.00 paper, illustrated

Pests of the Garden and Small Farm
A Grower’s Guide to Using Less Pesticide
Second Edition
Mary Louise Flint
In this extensively revised new edition, Flint adapts scientifically based integrated pest management techniques to the needs of the home gardener and small-scale farmer.
$35.00 paper, illustrated
