Fast Food
Roadside Restaurants in the Automobile Age
John A. Jakle and Keith A. Sculle
Jakle and Sculle contemplate the origins, architecture, and commercial growth of wayside eateries in the United States over the past 100 years. Written in the informative style of their previous two books, *The Gas Station in America* and *The Motel in America*, this new volume examines the impact of the automobile on the restaurant business.

Waterstained Landscapes
Seeing and Shaping Regionally Distinctive Places
Joan Woodward
“Waterstained Landscapes is both deeply humanistic and environmentalist, subversively working against the spurious—and dangerous—dichotomy of nature versus culture. This is a guide for a walk around the block, a drive to the store, or the view seen landing at Denver International Airport. Waterstained Landscapes is also a manual on how to redesign those experiences.”—from the foreword by Kenneth Helphen

Transforming California
A Political History of Land Use and Development
Stephanie S. Pincetl
“Provides important background to the current, untenable state of affairs in land use planning, not only in California but across the American West. Pincetl’s work leads her to issue a call for renewed civic attention to the perils of environmental and landscape degradation.”—William Deverell, California Institute of Technology
440 pp., 55 illus., $45.00 cloth

The New American Village
Bob Thall
“These cool images are contemporary social records as surely as Walker Evans’s Depression chronicles.”—Ross Miller, University of Connecticut, author of *American Apocalypse* and *Here’s the Deal*

GRADUATE STUDIES IN LANDSCAPE ARCHITECTURE AT THE UNIVERSITY OF WISCONSIN-MADISON

The Department of Landscape Architecture is located on the campus of the University of Wisconsin-Madison. The graduate student in Landscape Architecture has access to a wide range of facilities and scholars from nearly every discipline, reflecting the University of Wisconsin-Madison’s worldwide reputation for education quality. The Department offers both a Master of Science (MSLA) and a Master of Arts (MALA) in Landscape Architecture.

Some 3700 courses are offered by more than 125 departments located on the Madison campus. Students take advantage of nationally ranked campus libraries, the resources of the State Historical Society of Wisconsin; the facilities of the Madison Area Computing Center; the Center for Restoration Ecology at the University Arboretum; the collections for the Elvehjem Museum of Art; and the resources of Wisconsin state government.

The graduate program in Landscape Architecture is based on the premise that research and teaching should generate and synthesize new information for the purpose of raising the performance level in landscape planning, management, and design. The graduate program is particularly known for its instruction and research in cultural resource preservation and landscape history; plant community assessment, management, and restoration; and the integration of cultural and natural resources in developing solutions for landscape problems.

SCHOOL OF LANDSCAPE ARCHITECTURE
LOUISIANA STATE UNIVERSITY
GRADUATE PROGRAM

The Master of Landscape Architecture program at Louisiana State University provides students with the opportunity to explore the role of nature, culture, and individuals in shaping the built environment through the activity of design. The Lower Mississippi Valley, a rich cultural and natural region, serves as a laboratory for examination of the processes of landscape evolution and design.

LSU is a Research University 1, placing it in the top 2 percent of the nation’s colleges and universities. The MLA program belongs to the Southern Academic Common Market, offering students from five southern states resident tuition. Assistantships and other financial aid are available to qualified applicants.

Study tracks for students with degrees in design fields and for those seeking a first professional degree with bachelor’s degrees from other fields accommodate a range of individual student interests.

The 1930 Olmsted-Bartholomew Plan for the Los Angeles Region
Greg Hise and William Deverell
Afterword by Laurie Olin
"A compelling and fascinating description of a possible Los Angeles that never came to be. [The authors] have resurrected the Olmsted Brothers' 1930 plan for Los Angeles County, and then, in a wonderful introduction, put the plan in context so that to read it now is to see not only what seemed dangerous and possible in 1930 but also how and why one route to the present was chosen over others." —Richard White, author of The Organic Machine

Pleasant Places
The Rustic Landscape from Breugel to Ruisdael
Walter S. Gibson
The varieties of pleasure and their expression in Dutch rustic landscapes of the seventeenth century are recurring themes in Walter S. Gibson's engaging new book. Gibson focuses on Haarlem between 1600 and 1635, in his interpretation of Dutch landscapes and emphasizes prints, the medium in which the rustic view was first made available to the general art-buying public.

DESIGNING HEALTHY CITIES:
Prescriptions, Principles, and Practice
by Joseph L. Aicher
With the surging interest in environmental issues, municipalities worldwide are placing greater emphasis on public health in community planning. Designing Healthy Cities will serve as an invaluable aid in the decision-making process by ensuring that all aspects of public health are considered. Combining a clear presentation of the state of the science with prescriptions for healthy community design, this manual provides a concise but complete framework that can be used by planning and design professionals to promote human health.

DWELLING, PLACE AND ENVIRONMENT
edited by David Seamon & Robert Mugerauer
This volume considers how buildings, places, and environments might sustain a more powerful sense of human wholeness, identity, and life. Contributors include philosophers, geographers, architects, and psychologists, who use a phenomenological approach to explore such themes as environmental experience, sense of place, architecture as at-homeness, and environmental design as place making.

Edited by Robert F. Sayre

As restoration ecologists and amateur prairie preservationists recover the land, this book recovers the prairie of the American imagination—past, present, and future.

Beautifully illustrated with the work of sixteen contemporary prairie artists, Recovering the Prairie celebrates and examines the perspectives of artists, writers, native peoples, ecologists, and landscape architects who recognized the unique beauty of the prairie. And, this volume brings together people from many fields to consider the connections between aesthetics and economics, landscape and culture, politics and ethics, as illustrated by the prairie in American civilization.

"I do not know of another book that brings together individuals from so many fields to meditate on the prairie landscape, its biota, and its natural and cultural prospects. This impressive and richly illustrated volume will appeal to general readers as well as to scholars interested in literature, history, American studies, art history, geography, landscape, and ecology."

—Wayne Franklin, author of Discoverers.

Humphry Repton
Landscape Gardening and the Geography of Georgian England
Stephen Daniels
Humphry Repton (1752-1818) was the leading landscape gardener of later Georgian England. Stephen Daniels frames Repton’s life and work in terms of five domains—the road, the country, the picturesque, the aristocratic estate, and the urban periphery—and casts new light on the role of landscape in English culture and society.
