NATIVE PLANTS

JOURNAL

Edited by Stephen Love

ISSN: 1522-8339, e-ISSN: 1548-4785, 3/year

Native Plants Journal is a forum for dispersing practical information about planting and growing North American (Canada, Mexico, and U.S.) native plants for conservation, restoration, reforestation, landscaping, highway corridors, and related uses. Topics include seed germination, planting techniques and tools, equipment, cultural techniques, production trends, seed collection, genetics, and fertilization. The second issue of each year includes the Native Plants Materials Directory, which provides information about producers of native plant materials in the

U.S. and Canada. Relevant books are reviewed. Subscribers receive online access to all back issues. Volumes one through five are open access and available to all.

Native Plants Journal began in January 2000 as a cooperative effort of the USDA Forest Service and the University of Idaho, with assistance from the USDA Agricultural Research Service and the Natural Resources Conservation Service.
