In a book that celebrates the artist-intellectuals who have made our natural spaces particularly intriguing, Walter L. Creese analyzes the historical essence of eight renowned American sites and their architecture. In the first part on large spaces, he demonstrates how designers of unusual sensitivity, Thomas Jefferson, A. J. Downing, and F. L. Olmsted, developed Charlottesville, the Hudson and Yosemite Valleys, and Mount Hood National Forest. The second edition reveals four "hidden," smaller places as solutions to mundane challenges. The analysis of the Boston Fens, a facsimile coastal marsh, Graceland, Chicago's landscaped cemetery, Chicago's enclosed Riverside suburb, and finally, Wright's Taliesin Valley yields new insight into architecture's role in uniting landscape with human goals.

320 pages. 16 color illus., 138 halftones, 8 maps. 7 1/2 x 10". $55.00
The Public Landscape of the New Deal
Phoebe Cutler

In the first book to examine the landscape architecture of the New Deal era, Cutler provides a lively history of the diverse landscape projects administered by the National Emergency Works Program—among them Timberline Lodge, the Blue Ridge Parkway, the San Antonio canal system, the San Francisco Zoo, and scores of parks and playgrounds. Her vivid account of the creation of these “artifacts of hard times” provides fresh insights into the rise of the profession of landscape architecture.

Available in paperback

Discovering the Vernacular Landscape
John Brinckerhoff Jackson

A pioneer in landscape studies takes us on a tour of landscapes past and present to show how our surroundings reflect our culture.

“No one who cares deeply about landscape issues can overlook the scores of brilliant insights and challenges to the mind, eye, and conscience. . . . It is a book to be deeply cherished and to be read and pondered many times.”
—Wilbur Zelinsky, Landscape

“A vital and seminal text: do beg, borrow or buy it.”
—Robert Holden, Landscape Design

HUMANSCAPE: Environments For People
by Stephen Kaplan and Rachel Kaplan

HUMANSCAPE provides a unique perspective on humans and their relationship to the environment. It provides an information processing point of view, but one that is more synthetic than is traditional. Here, territory and privacy, stress and coping, even aesthetics, are related within an informational framework.

HUMANSCAPE deals with the uncertain environment in which humans find themselves and views this uncertainty as both a problem and a challenge. For while uncertainty brings with it the threat of confusion, it can also provide the opportunity to test one’s skills, to venture, to explore.

To order, send $15.95 plus $2.00 for postage and handling. (Check, MasterCard or Visa)

ECOSYSTEMATIC DESIGN CASE STUDIES

The 606 Studio in the Graduate Program in Landscape Architecture at Cal Poly, Pomona, has engaged in 60 case study landscape planning and design projects over the last decade. In response to requests, reports on several of these projects are now available to interested parties:

- PALM CANYON LAND MANAGEMENT AND DESIGN ALTERNATIVES for the City of Palm Springs, 1981. Design for a unique (native palm) environment in the low desert - Palm Springs.

- MIRACLE MILE PEDESTRIAN STUDY for the Los Angeles City Planning Department, 1983. Urban design for the Miracle Mile section of Wilshire Boulevard in Los Angeles.

- WESTWOOD BOULEVARD URBAN DESIGN STUDY for the Los Angeles City Planning Department, 1984. Design for a commercial and residential neighborhood and the implications of the urban ecology.

- LANDSCAPE DESIGN GUIDELINES FOR WATER CONSERVATION IN THE CHINO BASIN for the San Bernardino County Flood Control District, 1984. Water management and practices for an urbanizing region.

- WIND ENERGY STUDY, for the Angeles National Forest, 1983. Planning and environmental analysis for wind energy generation on National Forest lands on the edge of an urban area.

Reports may be purchased for $20.00 postpaid. Please make checks payable to the Graduate Landscape Architecture Development (GLAD) Fund. Write to:

Journal for Landscape Architecture and Landscape Planning

This review is the leading monthly magazine in Europe for landscape architects. Internationalization and the resultant co-operation of nations, the “look at the other side of the fence” that is necessary today, commissions from foreign countries, and the tasks faced by landscape planners in less developed and underdeveloped countries demand an extensive, internationally oriented store of information.

GARTEN + LANDSCHAFT is the leading monthly magazine in Europe for landscape architects, architects, engineers, and all involved with authorities in landscape architecture, environmental planning and management. The chief themes covered are town and open space planning, project planning, historical gardens, competitions, plants and their uses, details and constructions, and questions of professional training.

GARTEN & LANDSCHAFT appears monthly in a bilingual edition German/English and costs DM 34.00 a year, for students DM 24.60 (only in return for a student’s certificate).

If you like to get a free sample issue, write to the following address:

Callwey Verlag  Postfach 800409  8000 München 80  West-Germany

SUBSCRIBE to LANDSCAPE ARCHITECTURAL REVIEW to keep up to date with feature articles on landscape architecture in Canada.

LANDSCAPE ARCHITECTURAL REVIEW is dedicated to the publication of articles on a wide variety of topics related to the design, planning and management of the Land, and covering a wide range of subject areas including landscape design, construction and history, landscape preservation and rehabilitation, environmental planning and conservation.

Published five (5) times yearly, LANDSCAPE ARCHITECTURAL REVIEW is the only landscape architectural publication in Canada, appearing with articles in English as well as French.

SUBSCRIBE NOW at the low rates of $18.00 per year in Canada and U.S.A., $30.00 for airmail delivery to other countries.

Students in landscape architecture may receive copies at half of the above rates. All subscription rates are based on a calendar year.

Please make cheques payable to LANDSCAPE ARCHITECTURAL REVIEW and send to Landscape Architectural Review, 24 Kensington Avenue, Willowdale, Ont., M2M 1R6, Canada.
PROTECTING FARMLANDS

Edited by FREDERICK R. STEINER, MRP
Associate Professor
Horticulture and Landscape Architecture Dept.
Washington State University
Pullman, WA

JOHN THEILACKER, Associate Planner
Whitman County Regional Planning Council
Pullman, WA

- DETERMINING THE FUTURE OF CROPLANDS
- UNDERSTANDING THE ISSUES
- EXAMINING MULTILATERAL PROTECTION
- IDENTIFYING RESPONSIBILITIES

Any person involved in studying and researching farmland protection and its corollaries will find this collection of information essential in obtaining an overview of the issues and of current national and international approaches and concerns.

CONTENTS:
PART I OVERVIEW OF FARMLANDS PROTECTION
CHAPTER 1. The Loss of Cropland: Whose Issue is it? J. Jeffords
CHAPTER 2. Public Involvement in Land-Use Issues, J.B. Jackson
CHAPTER 3. Farmland Protection: Legal and Constitutional Issues, J.C. Keene
CHAPTER 4. The Ethical Dimension of Farmlands Protection, R.N. Sampson
CHAPTER 5. Farming on the Urban Fringe, R. Blobaum
PART II LOCAL APPROACHES FOR FARMLANDS PROTECTION
CHAPTER 6. Three Guidelines for Communities in Protecting Farmland, W. Toner
CHAPTER 7. Local Approaches to Farmland Preservation: A Rural Renaissance for Zoning, J. Kartez
CHAPTER 8. King County, Washington's Purchase of Development Rights Program, J. Spellman
CHAPTER 10. Techniques for Protecting Prime Agricultural Land, Zoning Applications in York County, Pennsylvania, W. Conn
PART III STATE APPROACHES FOR FARMLANDS PROTECTION
CHAPTER 13. Wisconsin's Farmland Preservation Program, J. Johnson
CHAPTER 14. Oregon's Agricultural Land Protection Program, R. Eber
CHAPTER 15. Protection Efforts in the Northeastern States, M. Lapping
CHAPTER 16. State Tax Relief Programs to Preserve Farmlands, R.W. Dunford
PART IV FEDERAL INVOLVEMENT IN FARMLANDS PROTECTION
CHAPTER 19. The National Agricultural Lands Study (NALS), R.J. Gray
CHAPTER 20. SCS Important Farmlands Mapping Program, R. Didrikson
PART V EUROPEAN AND INTERNATIONAL FARMLANDS PROTECTION EFFORTS
CHAPTER 21. Canadian Provincial Farmlands Protection Programs, C.R. Bray
CHAPTER 22. The European and International Experience with Farmland Protection: Some Inferences, D. Miner, M. Chorich and M.B. Lapping
CHAPTER 23. The Protection of Farmlands in the Netherlands, F.R. Steiner

In 1953, George Stewart published a compelling photographic record of his cross-country journey from Atlantic City to San Francisco. *U.S. 40* was immediately acclaimed as a minor classic, unique in conception and important in its penetrating analysis of America's natural and cultural landscape.

Now, thirty years later, geographers Thomas R. Vale and Geraldine R. Vale have retraced Stewart's probing tour across the highway, documenting their own voyage of discovery with an updated series of photographs (each, paired with Stewart's original, shot from the same location) and commentary. The result, as keenly observed and recorded as the original, is both a perceptive assessment of landscape changes in the United States over the past three decades and a spirited, inspiring, and distinctly American travelogue.

We follow the Vales' progress—from Atlantic City through Baltimore, Columbus, Kansas City, Denver, Salt Lake City, and Reno, finally reaching land's (and highway's) end at San Francisco—with pleasure and involvement, partners in a rediscovery of a transformed, yet sometimes mysteriously immutable, America today.

**Thomas R. Vale** is Professor of Geography at the University of Wisconsin-Madison. He has contributed articles on American ecology and landscapes to a number of scholarly and environmental journals. As evidenced by this work, he is an inveterate traveler, an accomplished photographer, and a sharp observer of the American landscape. **Geraldine R. Vale** is a teacher of English and geography in the Madison public schools. Her work has appeared in the professional literature.

1983. 208 pages, 147 illus., maps. Cloth $27.50; paper $14.95

ASLA Publishes: Perspectives: An Effective Design Tool

PERSPECTIVES: AN EFFECTIVE DESIGN TOOL
By James E. Hiss, ASLA

The presentation of technical guidelines in this book is made in an informal and lighthearted nature with graphics that clearly communicate the concepts without losing technical effectiveness.

This unusual book presents new perspective concepts through simple graphic associations while it builds the reader's understanding with familiar, yet challenging drawing techniques. It differs from any other book on the market in three important ways because it represents:

- a highly effective light technical approach to the basics of perspectives
- a new and remarkable simplified system for preparing accurate perspectives
- an essential strategy for increasing efficiency and graphic impact in professional design presentations

ASLA Book Examines Energy Efficient Design

ENERGY-CONSERVING SITE DESIGN
Edited by E. Gregory McPherson
Produced and Published by The Landscape Architecture Foundation and The American Society of Landscape Architects

Incorporating a decade of technical advances and experience in this developing science, eleven experts in landscape architecture, architecture and planning have recently released the findings of their research and practice in a remarkable volume entitled Energy Conserving Site Design.

Though most landscape architects are familiar with the basic strategies for energy-conscious site development, this new work provides a single source of information on the subject which until now has not been available. Energy Conserving Site Design is organized in four major sections which address the broad aspects of development benefits, site analysis, landscape design and community planning strategies for the future.

Non-ASLA Members $21.95
Multidisciplinary Landscape Architectural Design
at the
University of Michigan

The School of Natural Resources is offering two and three year programs leading to the Master's in Landscape Architecture degree, as well as a Ph.D. program in Landscape Architecture. The programs of study will equip graduates with skills and experience for effective contributions to the profession. Coursework will include rigorous training with an emphasis on integrative multidisciplinary problem-solving. Students from a diverse range of academic backgrounds are encouraged to apply.

For an application and program description write to:

GRADUATE PROGRAMS

The Master of Landscape Architecture program at Louisiana State University provides preparation for a professional career in landscape architecture.

The program is directed towards advanced study and specialization in design and research. Study tracks are offered for either a first professional degree or study beyond the accredited program degree.

L.S.U. is the center of academic research and advanced studies in Louisiana. The MLA program at Louisiana State University has been selected for The Southern Academic Common Market offering students from five southern states resident tuition. L.S.U. is located in the heart of Louisiana's rich historical, cultural, and natural landscape. Study opportunities are available to accommodate a range of individual student interests.

Assistantships and other financial aid are available to qualified applicants.

Form and Meaning in the Landscape
GRADUATE STUDY IN LANDSCAPE ARCHITECTURE AND ENVIRONMENTAL PLANNING
UTAH STATE UNIVERSITY

The Department provides educational opportunities for individuals interested in careers in site planning, design, and management of town, rural, and wilderness environments. The Department offers two graduate degrees: Master of Landscape Architecture and Master of Science in Town and Regional Planning. The Department also offers a fully accredited undergraduate program in landscape architecture.

MLA—Advanced Professional Degree: A two-year program of self-directed study requiring a high degree of personal and professional motivation.

MLA—Basic Professional Degree: A three-year program available for candidates with a previous baccalaureate in a field other than landscape architecture.

M.S.—A two-year program emphasizing planning for large areas with dispersed populations and an economic base in agriculture, energy development and natural resources.

Formal areas of specialization are provided in conjunction with other colleges and departments on campus. These are: Land Rehabilitation/Revegetation, Water Resources, Public Lands and Recreation, Small Town Rehabilitation, and Academic/Research Practice.
